

SARATH K

JAVA BACKEND DEVELOPER | BACKEND SOFTWARE ENGINEER

+91 63791 54010 | sharathk09122005@gmail.com | github.com/sharath-fsd | linkedin.com/in/sarath-k-2005-

PROFESSIONAL SUMMARY

Entry-level Backend Software Engineer with hands-on experience developing backend services and REST APIs using Java, Spring Boot, Spring MVC, Spring Security, Hibernate/JPA, MySQL, and JWT. Built full-stack applications involving backend service development, database interactions, authentication, authorization, CRUD operations, API testing, and frontend-backend integration. Familiar with PostgreSQL, Docker/containerized environments, Git, Maven, JUnit 5, CI/CD concepts, Python, and AI API integrations. Strong foundation in problem solving, Core Java, OOP, Collections, SQL, debugging, and Data Structures and Algorithms, with 200+ LeetCode problems solved. Interested in backend engineering, reliability, security, troubleshooting complex technical issues, and continuous improvement.

TECHNICAL SKILLS

Programming Languages:	Java, JavaScript (ES6+), SQL, Python
Backend Development:	Spring Boot, Spring MVC, Spring Security, RESTful APIs, Hibernate/JPA, JWT, CRUD, Microservices, OAuth2
Security:	Authentication, authorization, role-based access control, Spring Security, JWT
Databases:	MySQL, PostgreSQL, SQL, RDBMS, relational database design
Core Java:	OOP, Collections Framework, exception handling, multithreading, file handling
Testing and Delivery:	JUnit 5, Postman, Maven, Docker, Git, GitHub, CI/CD concepts, debugging
Frontend and Integration:	React.js, HTML5, CSS3, Bootstrap, Material UI, Axios, AI API integrations
Data Structures and Algorithms:	Arrays, binary search, linear search, bubble sort, selection sort

PROFESSIONAL EXPERIENCE

Self-employed Backend Developer | Beauty Parlour Management System

7 months

Client project | Independently owned beauty parlour

Full-stack delivery

- Built and delivered a management system for my aunt's independently owned beauty parlour, translating day-to-day shop needs into service-management and appointment-booking workflows.
- Owned backend development across Spring Boot REST services, secure role-based access, CRUD operations, MySQL persistence, API testing, and React.js integration.
- Tested and debugged endpoints with Postman and iterated on application behavior throughout the seven-month client engagement.

PROJECTS

Beauty Parlour Management System

Technologies: Java | Spring Boot | Spring Security | JWT | Hibernate/JPA | MySQL | Maven | REST APIs | React.js

GitHub: <https://github.com/sharath-fsd/Beauty-Parlour-web-application->

- Developed RESTful backend services using Spring Boot and Spring MVC for service management and appointment booking.
- Implemented JWT authentication, authorization, and role-based access control using Spring Security.
- Built database persistence and CRUD functionality using Spring Data JPA, Hibernate, and MySQL.
- Integrated the React.js frontend with backend REST APIs using Axios for client-server communication.
- Tested and debugged REST API endpoints using Postman.

PROJECTS - CONTINUED

E-Commerce Shopping Application

Technologies: Java | Spring Boot | Spring Security | JWT | Hibernate/JPA | MySQL | Maven | REST APIs | React.js

GitHub: <https://github.com/sharath-fsd/e-commerce-website-project-with-Backend>

- Developed backend REST APIs for product management, CRUD operations, and frontend-backend communication.
- Implemented secure authentication and authorization using Spring Security and JWT.
- Designed relational entities and implemented database persistence using JPA, Hibernate, and MySQL.
- Tested backend APIs and application functionality using Postman.

Car Rental Management System

Technologies: Java | Spring Boot | Hibernate/JPA | MySQL | Maven | REST APIs

GitHub: <https://github.com/sharath-fsd/Car-Rental-Management-System-Project>

- Developed RESTful backend services for vehicle and rental management using Java and Spring Boot.
- Implemented CRUD operations and relational database persistence using Spring Data JPA, Hibernate, and MySQL.
- Implemented authentication and authorization functionality for application access.
- Used SQL for database operations and integrated backend services with the web interface through REST APIs.

EDUCATION

Bachelor of Engineering (B.E.) - Electronics and Communication Engineering

King's Engineering College, Sriperumbudur | 2022 - 2026 | CGPA: 7.7

ACHIEVEMENTS

- Solved 200+ Data Structures and Algorithms problems on LeetCode through consistent problem-solving practice.
- Practiced arrays, binary search, linear search, bubble sort, and selection sort.

CERTIFICATIONS

- Spring Framework for Java Development - SkillUp / Coursera, 2026
- Java App Development Project: Fundamentals, OOP and File I/O - SkillUp / Coursera, 2026
- IBM Object-Oriented Programming in Java - Coursera
- IBM Introduction to HTML, CSS, JavaScript - Coursera
- React.js for Beginners: Hooks, State Management, Component Architecture - Mind Luster

ADDITIONAL STRENGTHS

Java and OOP | Backend API development | Spring Boot | Spring Security and JWT | MySQL and Hibernate/JPA | Docker and Maven | Postman and JUnit 5 | Problem solving and debugging | Reliability and continuous improvement
